### 👤 PROFILE

Full-stack developer with experience in modern web technologies and database design. Proven track record of building scalable applications using React, Node.js, and MongoDB. Strong background in API integration, web development, and agile project management.

### 💼 PROFESSIONAL EXPERIENCE

#### Full-Stack Developer, Bluejarvis Technologies

08/2025 – Present | Remote

- Collaborate with diverse team using Jira for task management and Slack for team communication to develop innovative questionnaire platform addressing licensure and alternative career pathways for international medical graduates.
- Assist with developing full-stack web application using Vue.js, Node.js, and Firebase database integration.
- Working on including AI-powered features, integrating Gemini API to automatically source and update licensure information.

#### Project Manager/Full-Stack Developer (Volunteer), Destination History Inc (w/ SAIT)

01/2025 – 08/2025 | Calgary, AB

- Led cross-functional team of 5 developers using Trello, incorporating a 3-sprint Agile approach to build an innovative travel application for Alberta's secondary tourism markets.
- Developed full-stack mobile features using React Native, Node.js + Express, and MongoDB database integration.
- Integrated API services including Supabase, Google Maps, Stripe, and Azure.
- Manage complete SDLC from requirements gathering through deployment.
